

Erica Fu – Product/UX Designer

New York, NY

ericawfu@gmail.com | [linkedin.com/in/ericawfu/](https://www.linkedin.com/in/ericawfu/) | ericafu.me/

Education

Carnegie Mellon University – B.S. in Human-Computer Interaction & Information Systems May 2024
Minor in Design, CS, & Soft Technology, GPA: 3.88/4.0, Dean's List 8 semesters

Experience

JPMorganChase – UX Designer July 2024 – present

- Led AI-powered experience design by creating interactive Figma prototypes, data-driven personas, storyboards, and demo videos that aligned product, engineering, and external vendor teams on short-term MVP execution while inspiring future-state visions.
- Partnered with researchers and led three focus group usability studies to uncover pain points, translating insights into opportunities that improved specialist efficiency, accuracy, and consistency, enhanced user experience, and addressed broader challenges such as AI adoption.
- Created 5+ service blueprints to visualize current-state workflows across teams and users, simplifying complex enterprise processes while advocating for user needs amid technical and business constraints.

Equinix – UX Design Intern May – Aug 2023

- Analyzed feature performance using Amplitude and FullStory analytics to identify UX pain points and recommend improvements to encourage adoption of a modernized legacy workflow.
- Redesigned complex network connection workflows for cloud services with stronger information hierarchy and visualizations, increasing efficiency and usability for technical users in high-stakes tasks.
- Developed a scalable design system with reusable Figma components and developer handoff files, adopted by four cross-functional teams beyond the original scope.
- Conducted 15 think-aloud usability tests and prototype validations, influencing product roadmap decisions and setting the stage for subsequent A/B testing.

Zeno - CMU DIG Lab – UX Designer May 2022 – Dec 2023

- Performed competitive analysis of data filtering strategies in mainstream consumer apps and conducted expert interviews with ML practitioners to identify design opportunities.
- Crafted user flows and interfaces for slice-based ML evaluation tools that empower ML engineers to diagnose and improve model performance.
- Validated designs through usability testing, incorporating user feedback to iteratively enhance value and experience.

Leadership

Design for America @ Carnegie Mellon – President Sept 2020 – May 2024

- Led 18 project teams over the course of 3 years, collaborating with nonprofits and academia to tackle social-impact challenges using human-centered design.
- Created and delivered educational curriculum and hands-on project experience on design thinking, mentoring 100+ members and cultivating a culture of empathy and innovation.
- Organized and led three years of ImpactCMU, a flagship event celebrating social-good initiatives; managed marketing, design, event website development, project coordination, and space logistics, amplifying visibility and community engagement.
